

Maximise the revenue opportunity of Short-term Rentals

In addition to vehicle rental providers, the opportunity to supply short-term rentals is a potential revenue stream for leasing companies and fleet management specialists.

Whether it's daily, courtesy, temporary and relief vehicles, with fixed trips and Chauffeur Drive options, the mobility segment for B2B and B2C is growing.

Bynx ensures you power that potential by managing the acquisition, movement, allocation and invoicing of your rental fleet and defines utilisation and tariff rules that support your business.

Use **Bynx** to manage your short-term vehicle rental fleet and those vehicles provided by external suppliers.

Fleet Management

Vehicle Leasing & Finance

Short Term Hire & Daily Rental

Fleet Operators

Car Sharing / MaaS

Passenger Transport (Ride-Hailing/Chauffeur/Limo/Bus)
